Notes:

1. AC Interrupting Rating tested at rated voltage with unity power factor. DC Interrupting Rating tested at rated voltage with time constant < 0.8 msec.

2. Nominal Resistance measured with < 10% rated current

3. Contact Littlefuse if application transient surges are less than 1 ms.

4. Nominal Voltage Drop measured at rated current after temperature has stabilized.

Devices designed to carry rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Re-rating Curve" for additional re-rating information. Devices designed to be mounted with marking code facing up.

Description

This 100% Lead-free, RoHS compliant and Halogen-free fuse series has been designed specifically to provide over current protection to circuits might encounter high working ambient temperatures (up to 150°C).

The general design ensures excellent temperature stability and performance reliability.

In addition to this, the high l²t values typical of the Littelfuse Ceramic Fuse family ensure high inrush current withstand capability.

Features

- Operating Temperature from -55°C to +150°C
 - Suitable for both leaded and lead-free reflow / wave soldering

RoHS Ø HF c HL us (f)

- 100% Lead-free, Halogen-Free and RoHS compliant
 UL Recognized to UL/
 - UL Recognized to UL/ CSA/NMX 248-1 and UL/ CSA/NMX 248-14

Applications

- LCD Displays
- Servers
- ScannersData Modems
- Printers

Note:

1. Re-rating depicted in this curve is in addition to the standard re-rating of 20% for continuous operation.

Example: For continuous operation at 75 degrees celsius, the fuse should be rerated as follows: I = $(0.80)(0.85)|_{RM} = (0.68)|_{RAT}$
